

THE 10th INTERNATIONAL CONFERENCE ON EDUCATIONAL DATA MINING

WUHAN, CHINA
JUNE 25 - 28, 2017

Proceedings of the 10th International Conference on Educational Data Mining

X. Hu, T. Barnes, A. Hershkovitz, L. Paquette (Eds)

International Conference on Educational Data Mining (EDM) 2017
Proceedings of the 10th International Conference on Educational Data Mining
Xiangen Hu, Tiffany Barnes, Arnon Herskovitz, Luc Paquette(eds)
Wuhan, China, June 25-28, 2017

Preface

The 10th International Conference on Educational Data Mining (EDM 2017) is held under the auspices of the International Educational Data Mining Society at the Optics Valley Kingdom Plaza Hotel, Wuhan, Hubei Province, in China. The conference, held June 25th - June 28th, 2017, follows the nine previous editions (Raleigh 2016, Madrid 2015, London 2014, Memphis 2013, Chania 2012, Eindhoven 2011, Pittsburgh 2010, Cordoba, 2009 and Montréal 2008).

The EDM conference is the leading international forum for high-quality research that leverages educational data, learning analytics, and machine learning to answer research questions that shed light on the learning processes. Educational data may come from traces that students leave when they interact with learning management systems, interactive learning environments, intelligent tutoring systems, educational games or when they participate in other data-rich learning contexts. The types of data range from raw log files to data captured by eye-tracking devices or other kind of sensors. The methods used by EDM researchers include analytics, data science, data mining, machine learning, as well as social network analysis, graph mining, recommender systems, and model building.

This years conference features two invited talks by: Dr. Jie Tang, Associate Professor with the Department of Computer Science and Technology at Tsinghua University; and Dr. Ron Cole, President of Boulder Learning Inc. Together with the Journal of Educational Data Mining (JEDM), the EDM 2017 conference supports a JEDM Track that provides researchers with a venue to deliver more substantial mature work than is possible in a conference proceedings and to present their work to a live audience. The papers submitted to this track followed the JEDM peer review process; five papers have been accepted to the track and will be presented at the conference. The abstract for the invited talks and accepted JEDM Track papers can be found in the proceedings.

The main conference invited contributions to the Research Track and Industry Track. We received 122 submissions (71 full, 47 short, 4 industry). We accepted 18 full papers (25% acceptance rate) and 32 short papers for oral presentation (42% acceptance rate) and an additional 39 for poster presentations, 3 demonstrations. The industry track includes all 4 submitted industry papers and 1 paper initially submitted as a full paper.

The EDM conference provides opportunities for young researchers, and particularly Ph.D. students, to present their research ideas and receive feedback from the peers and more senior researchers. This year, the Doctoral Consortium features 6 such presentations. In addition to the main program, the conference includes 3 workshops: Graph-based Educational Data Mining (G-EDM 2017); Sharing and Reusing Data & Analytics Methods with LearnSphere; Deep Learning with Educational Data, and 2 tutorials: Why Data Standards are Critical for EDM and AIED; and Principal Stratification for EDM Experiments.

We thank the sponsors of EDM 2017 for their generous support: 17Zuoye, Coursera, Learnta, and the Prof. Ram Kumar Memorial Foundation. We also thank the program committee members and reviewers, who with their enthusiastic contributions gave us invaluable support in putting this conference together. Last but not least we thank the organizing team.

Organization

Conference Chairs

Xiangen Hu	University of Memphis, USA, Central China Normal University, China
Tiffany Barnes	North Carolina State University, USA

Program Chairs

Arnon HersHKovitz	Tel Aviv University, Israel
Luc Paquette	The University of Illinois at Urbana-Champaign, USA

Workshop and Tutorials Chairs

Ran Liu	Carnegie Mellon University, USA
Michael Eagle	Carnegie Mellon University, USA

Poster Chairs

Mariluz Guenaga	Deusto University, Spain
Pedro J. Muñoz-Merino	Universidad Carlos III de Madrid, Spain
Rinat Rosenberg-Kima	Tel Aviv University, Israel

Industry Track Chairs

Giora Alexandron	Center for Educational Technology, Israel
Qian Zhou	Tsinghua University, China

Doctoral Consortium Chair

Min Chi	North Carolina State University, USA
Mingyu Feng	SRI International, USA

JEDM Track Chair

Radek Pelanek	Masaryk University, Czech Republic
Agathe Merceron	Beuth University of Applied Sciences Berlin, Germany

Student Volunteers Chair

Ying Fang	University of Memphis, USA
-----------	----------------------------

Sponsorship Chair

Awards

Best papers and exemplary paper selection

The two program chairs selected 5 best paper nominees based on the reviews and meta-reviews for each of those paper. The nominees were then sent to the members of the best paper awards committee. Each committee member read and ranked each one of the nominees. Ranking was compiled and the best paper award was attributed to the most highly ranked paper. The best student paper award was attributed to the most highly ranked paper that was also authored by a student. The winner of the best paper award was not eligible to also win the best student paper award.

Best paper/best student papers committee:

Ryan Baker
Cristobal Romero

Michel Desmarais
Danielle McNamara

Zach Pardos
Didith Rodrigo

Award winners

Best paper	Efficient Feature Embeddings for Student Classification with Variational Auto-encoders <i>Severin Klingler, Rafael Wampfler, Tanja Kser, Barbara Solenthaler and Markus Gross</i>
Best student paper	Generalizability of Face-Based Mind Wandering Detection Across Task Contexts <i>Angela Stewart, Nigel Bosch and Sidney DMello</i>
Best paper nominees	Zone out no more: Mitigating mind wandering during computerized reading <i>Sidney D’Mello, Caitlin Mills, Robert Bixler and Nigel Bosch</i>
	Efficient Feature Embeddings for Student Classification with Variational Auto-encoders <i>Severin Klingler, Rafael Wampfler, Tanja Kser, Barbara Solenthaler and Markus Gross</i>
	Generalizability of Face-Based Mind Wandering Detection Across Task Contexts <i>Angela Stewart, Nigel Bosch and Sidney D’Mello</i>
	Towards Closing the Loop: Bridging Machine-induced Pedagogical Policies to Learning Theories <i>Guojing Zhou, Jianxun Wang, Collin Lynch and Min Chi</i>
	The Misidentified Identifiability Problem in Bayesian Knowledge Tracing <i>Shayan Doroudi and Emma Brunskill</i>
Best Poster Award	Identifying the relationships Between Students’ Questions Type and Their Behavior <i>Fatima Harrak, Franois Bouchet and Vanda Luengo</i>
